

# Fibre Optic Cleaning & Consumables

Fibre optic cleaning is one of the most basic, important and often overlooked procedures for maintaining fibre optic networks. FOS offers a comprehensive selection of Fibre optic cleaning & consumables for your factory or on-site termination and maintenance needs. FOS supplies a complete range of one-click cleaners, cartridge cleaners, cleaning sticks, lint free wipes and other cleaning products.

FOS fibre optic cleaning products can be relied on to help ensure optimal network performance is maintained. FOS also supplies a range of bundled cleaning kits, please refer to our Tool, Termination & Cleaning Kits datasheet.

## One-click Cleaners

Push style one click cleaners offer a convenient, efficient and repeatable cleaning tool for fibre optic networks. A single push extends an uncontaminated section of cleaning material from the nozzle of the tool using an automatic reeling system. These cleaners are highly effective at removing contaminants from the ferrule surface.
